To Braxton Elliott

,

I am interested in applying for the Java Developer position. This role is an exciting opportunity and a challenge that I am eager to take on!

I believe that my experience in the field would be a useful addition to your team. I would love to work with you and help Crist reach new heights.

Apart from my strong motivation and work ethic, I can offer your company my proven expertise and experience in the field.

For example, during my employment at Wolf Inc., I successfully:

Promoted from Junior Java Developer to Mid-Level Java Developer within 3 months of employment
Utilized GIT to manage collaboration with other departments and developers

What's more, I am experienced in Java, Scala, and Node.js.

I am certain my skills and qualifications will be of great use to your team.

Should you decide to move forward with an interview, please reach out to me! I would be happy to answer any questions you may have and discuss how I can help your company.

I am open to relocating for the right job. However, I would appreciate the chance to discuss my experience and qualifications over the phone and prove that I am suitable for this role.

Thank you for your time,
Alex Greenwood
